RGCS LLC

Federal IT services | Health IT | Appian | cloud | AI | cybersecurity.

CAPABILITY STATEMENT
https://www.easyitconsulting.com

WHO WE ARE

RGCS LLC is a small federal IT services firm in Duluth, Georgia. We bring large program discipline to agencies that need senior led delivery without large firm overhead. Our founder has directed some of the largest public health IT programs in the country.

CORE COMPETENCIES

Health IT and interoperability. HL7 v2, FHIR R4 APIs, public health surveillance and case reporting, secure data exchange with states and data partners.

Appian and low code. Case management, intake, and approval workflows. Appian, Power Apps, and SharePoint.

Cloud and DevSecOps. AWS and Azure migration, CI/CD with security scanning, infrastructure as code with Terraform and Bicep.

Data, analytics, and AI. Data pipelines and dashboards, retrieval augmented generation, agentic workflows, and AI governance under NIST AI RMF.

Cybersecurity. Zero Trust, NIST 800-53 controls, ATO support, and continuous monitoring.

IT modernization and O&M. Phased replacement of legacy systems, then disciplined operations and maintenance with SLA reporting.

LEADERSHIP EXPERIENCE

CDC VAERS. Led the full software engineering team at GDIT, 2016 to 2021. Program value over $150M.

CDC NHSN. Directed engineering to modernize the application from on premises legacy to cloud microservices at Leidos ($63.4M). National data processing cut from 12 hours to 1.5 hours.

CDC PHINMS. Led the team that built and deployed the messaging system used by state public health clinics and data partners.

Other agencies. Georgia DCH, CMS, and FDA programs, including EHR and supply chain modernization.
